

Apple: pre flowering applications

Aim of the trial

The objective of the trial is to reinforce the growth of the first leaves at the beginning of the season so that the flowering can take place under optimal conditions.

General information

Conditions of the trial:

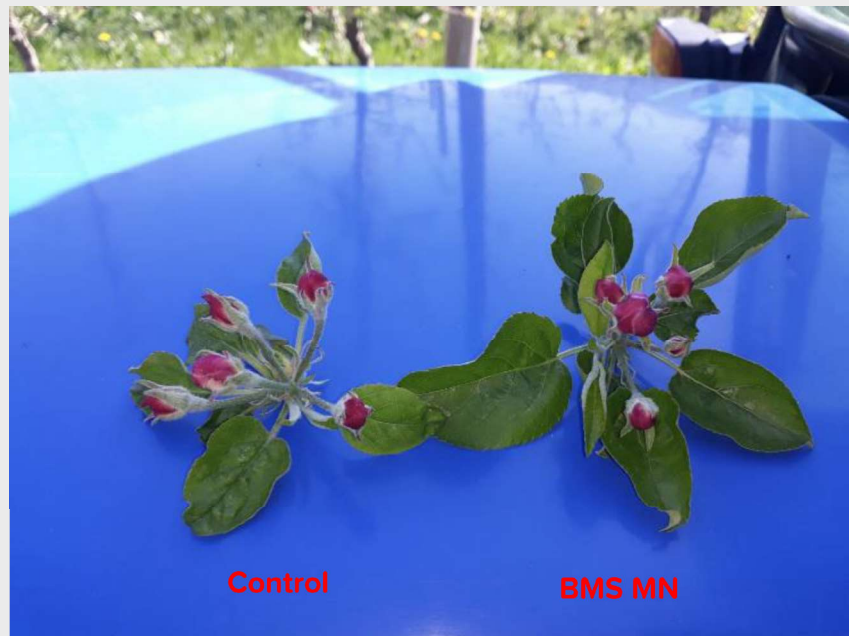

Trial location: Italy – Trento
Variety: Golden
In cooperation with: Azienda Toller di Caldonazzo

Treatments

2 modalities:

- **Untreated control**
- **BMS MN:** three treatments before flowering
 - o Fructol NF 1 kg/ha + Chelal B 0.5 L/ha
 - o Fructol NF 1 kg/ha + Chelal Mn 0.5 L/ha
 - o Fructol NF 1 kg/ha

Results

Conclusion: through the three applications before flowering, the first leaves are clearly better developed. This will improve the flowering and fruit set.
