

Peach: improving the fruit size

Objective of the trial

Verify the effect of the foliar program of BMS Micro-Nutrients developed for increasing fruit weight.

General information

Conditions of the trial:

Trial location: Italy – Veneto
Variety: Amiga
In cooperation with: l'Azienda Cordioli Giovanni
Harvesting date: 10/07/2017

Treatments

2 modalities (plots of 5 trees):

- ⇒ T0: Untreated control
- ⇒ T1: Program BMS MN
 - 1) Pre-flowering: Kappa V 10 kg/ha
 - 2) "Scamicatura": Chelal Noor 4 kg/ha

Results

	Weight of 100 fruits (kg)
T0: Control	19.34
T1: BMS MN	21.00

⇒ **Conclusion:** With the foliar nutrition program, fruit weight increases with **8.6%**.
