

Preparation of the soil

Mix 500 gr of **Microlan Zn** with 300 L turf

Nursery

Plant development:

2/3 treatments with **Azavis MnZn 5 L/ha (= 0,5 L/1000 m²) + Fructol NF 1,5 kg/ha (= 150 gr/1000 m²)** when plants are around 15 cm high

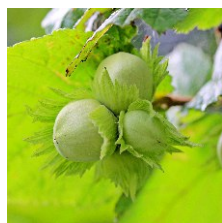

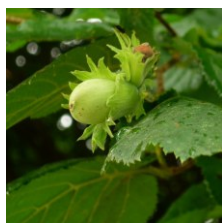

Maximum concentration of Azavis MnZn: 0,5 % (0,5 L in 100 L water)

During lignification:

Minimum 2 treatments with **Landamine PK 5 L/ha (= 0,5 L/1000 m²) + Chelal Kubig 2 L/ha (= 0,2 L/1000 m²)** interval between treatments 7/8 days

Maximum concentration of Landamine PK: 0,5 % (0,5 L in 100 L water);

Maximum concentration of Chelal Kubig: 1% (1L in 100 L water)

Treatments in the field

End of April: **Kappa M 5 kg/ha**
End of May: **Fructol NF 2 kg/ha**
Middle of June: **Fructol NF 2 kg/ha**
End of June: **Fructol NF 3 kg/ha**

Post harvest: **Chelal B 1 L/ha**
