

CHELAL[®] 3

EC FERTILISER: Mixture of micro-nutrients (iron(Fe), manganese(Mn), zinc(Zn))

Declared content:

Micro-nutrients expressed as percentage by weight:

Water-soluble iron (Fe): 4,5 % chelated by DTPA and EDTA (= 60 g Fe/L)

Water-soluble manganese (Mn): 1,2 % chelated by EDTA (= 15 g Mn/L)

Water-soluble zinc (Zn): 0,5 % chelated by EDTA (= 6 g Zn/L)

pH range guaranteeing acceptable stability of the chelated fractions: between pH=4 and pH=10

Product low in chloride.

To be used only where there is a recognised need. Do not exceed the appropriate dose rates.

Recommendations Do not exceed the maximum concentration of 0,5 % (= 0,5 L CHELAL[®] 3 in 100 L water).
Maximum concentration in greenhouse: 0,2 % (= 200 cc in 100 L water).
For foliar applications avoid high temperatures and bright sunshine.
Treat preferably during early morning or late evening.

Applications Consult our crop-related programs.

Characteristics CHELAL[®] 3 allows for a rational and adapted intervention into plant metabolism. After an easy and quick assimilation by the leaves, the product is optimally transported to all plant parts. The chelated form of the three elements present in CHELAL[®] 3 assures a good and swift absorption and translocation and thus avoids their mutual antagonistic effects. CHELAL[®] 3 is well suited to prevent, combat and control iron chlorosis. CHELAL[®] 3 supplies in the first place a substantial amount of iron, but it also supplies manganese and zinc, which are two elements that are normally little available in soils with a high pH value. Plants suffering from iron chlorosis often have to deal with manganese and zinc shortage as well. CHELAL[®] 3 alleviates these 3 deficiencies at the same time.

For additional information concerning the specific functions of iron, manganese and/or zinc in plant physiology, susceptibilities to and related deficiency-symptoms caused by these elements, please consult our technical sheets:

for iron: CHELAL[®] Fe

for manganese: CHELAL[®] Mn

for zinc: CHELAL[®] Zn

Cautions

- wash hands thoroughly after handling; do not drink, eat or smoke during handling.
- if swallowed, seek medical assistance.
- in case of contact with eyes, rinse with plenty of clean water.
- store in a cool, dry place, out of reach of children and animals. Always keep the product in its original container.
- store the product at a temperature between 40°F and 90°F (= 5°C - 30°C).
- this product can be used on most crops as long as maximum dose and concentration are respected. Since it contains boron, injudicious use on monocots (e.g. cereals, orchids, lilies,...) and greenhouse ornamentals may result in serious injury to the crops.

Miscibility CHELAL[®] 3 is miscible with most pesticides and herbicides. Avoid mixing with oil-based products. It is advisable to conduct a miscibility test before application. In case of doubt, consult our technical service.

Preparation of the solution Sometimes a light sediment can appear on the bottom of the can. This sediment is soluble in water. Shake well before use. Pour CHELAL[®] 3 into the sprayer tank while filling with water. Continue stirring until the solution is applied.

Warranty

The liability of the manufacturer is limited to delivery of the product in its original container in conformity with the guaranteed analysis, as indicated on this label. The manufacturer is not responsible for inappropriate or inaccurate use of the product nor for damage caused by weather conditions, soil characteristics or special sensitivity of crops and varieties. In no case shall BMS Micro-Nutrients be liable for consequential, special or indirect damages resulting from the use or handling of this product. All such risks shall be assumed by the buyer and/or user of the product. BMS Micro-Nutrients makes no warranties of merchantability of fitness for a particular purpose nor any other express or implied warranty except as stated above.
