

Doses are expressed per ha. Respect the maximum concentrations indicated on the product labels.

Fenological stages			
<b>General Program</b>	<p style="text-align: center;"><b>Landamine BMo:</b> 1-3 L/ha after each cut/harvest          3-4 applications per year (first application: use 3-5 L Landamine BMo/ha)</p> <p style="text-align: center;"><b>Chelal BMo:</b> 0,5-1 L/ha after each cut/harvest          3-4 applications per year (first application: use 1-1,5 L Chelal BMo/ha)</p>		

**Observations:**

Products are compatible with most herbicides and pesticides, so that the applications can be combined with these treatments. Please consult before mixing the miscibility list available on our website [www.chelal.com](http://www.chelal.com). In case deficiencies of other elements are present in the crop (Mg, Mn), please complement the programme with these products.
