

**PHENOLOGICAL
STAGES**

Soil preparation

Germination

Rosette formation

Start of growth in
spring

Flowering

Maturation
of the seeds

General Program	Landamine® BMo 3 - 6 L or Chelal® BMo 1 - 2,5 L						
Manganese deficiency				Chelal® Mn 1-2 L/ha			
Magnesium deficiency				Chelal® Mg 2-3 L/ha			

Doses are expressed per ha. Respect the maximum concentrations indicated on the product labels.

Observations:

Products are compatible with most herbicides and pesticides, so that the applications can be combined with these treatments.

Please consult before mixing the miscibility list available on our website www.chelal.com.
