

PHENOLOGICAL STAGES	T1 2 – 3 leaves	T2 14 days after T1	T3 14 days after T2
	Fructol® NF 2 kg	Fructol® NF 2 kg Chelal® FeMn 1 L	Fructol® NF 2 kg Chelal® FeMn 1 L

Doses are expressed per ha. Respect the maximum concentrations indicated on the product labels.

REMARK: In function of the development and vigorous growth of the plant add:

-Kappa V: 3 à 4 kg/ha, per treatment, to stimulate the vegetative growth of the plant.

-Kappa G: 3 à 4 kg/ha, per treatment to slow down vegetative growth, and to direct the energy of the plant towards the formation of fruits and to improve the quality of the fruit.

To keep the NO₃-concentration under control, we recommend also a foliar application with **Chelal® Mo** or **0,5-1 L/ha** at the moment of T2.
